Work Experience

Data Analyst Intern — Nexlyra Engineering Works Jul 2026 – Present

- Working on real live projects across various domains — construction, infrastructure, and manufacturing data.
- Working with tools like Excel, Power BI, Python, and SQL.

Data Analyst Intern — Quintype Technologies Inc, Bangalore Jun 2025 – Sep 2025

- Created interactive dashboards and visual reports using Looker Studio and Apache Superset.
- Collected and analyzed website traffic and user behavior data from Google Analytics 4 (GA4).
- Wrote complex SQL queries in Metabase to fetch and analyze client data from relational databases.
- Delivered data-driven insights to support business decisions and client reporting needs.

AI Prompt Engineer — Vortex.ai, Bangalore Mar 2024 – Sep 2024

- Crafted clear, concise, and user-centric voice prompts to ensure natural and intuitive interactions with voice bots.
- Designed conversational flows aligned with user behavior, needs, and expectations to enhance the overall experience.
- Maintained a consistent tone and persona that reflected the brand's identity across all bot scenarios and touchpoints.
- Developed scripts for diverse use cases, including greetings, FAQs, error handling, and personalized responses.

Projects

Comparison of Region-based Sales | Tableau

- Prepared a dashboard to compare revenue distribution, KPIs, and sales trends between two selected regions of the Sample Superstore dataset.
- Increased sales by 45% on the first order of Central & East regions; analyzed using charts, filters, calculated fields, and parameters.

Credit Card Financial Analysis Dashboard | Power BI

- Engineered a comprehensive financial dashboard using Power BI and DAX to visualize weekly transaction patterns and customer demographics.
- Implemented advanced features like dynamic filtering and slicers to track key metrics such as YTD revenue, total transaction counts, and interest growth across multiple categories.

HR Analytics Dashboard | Power BI

- Built an HR Analytics Dashboard in Power BI using Power Query and DAX to analyze employee attrition, workforce demographics, and retention trends, enabling data-driven HR decision-making.

Education

Post Graduate Program in Data Analytics — Simplilearn Alumni Dec 2025

BE Mechanical Engineering — Visvesvaraya Technological University Sep 2018

Skills

- | | | |
|---------------------|-----------------------------------|-----------------------------|
| • Power BI | • Dashboarding | • Data Visualization |
| • Data Analysis | • Exploratory Data Analysis (EDA) | • SQL |
| • Python (Pandas) | • Data Extraction | • Data Modelling |
| • Data Cleaning | • DAX | • Microsoft Excel |
| • Problem Solving | • Attention to Detail | • Logical Reasoning |
| • Data Storytelling | • Communication Skills | • Reporting & Documentation |
| • KPI Tracking | • Google Sheets | |
